

I would like to express my sincer opinion that the FCC should reject the National Association of Bradcasters petition 04-160. It seems to me that the NAB is attempting to prevent the service provider XM radio for giving their paying customers what they are paying for. I am paying XM radio for a service that I find to be invaluable. They provide a programming schedule that is not available anywhere else and sholud not be dictated by the NAB's attempt at controling what I listen to. I urge you to please support XM's free enterprise right to provide programming that its listeners pay for and value. Thank you,
Devin Bunch
